

Part Number: CA-GN0001

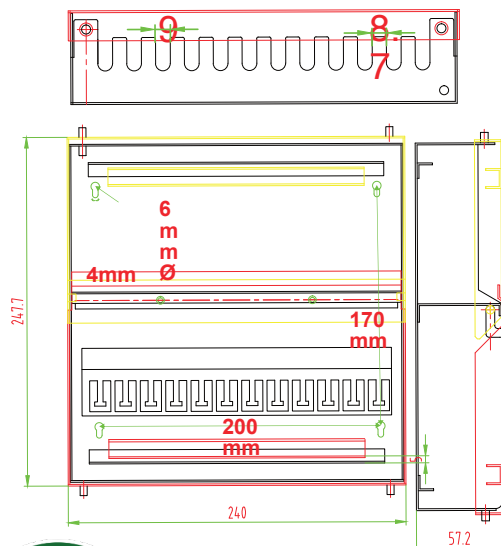

Description: GROVE Consolidation Point - 12 Port

Grove Consolidation Points, a user-friendly solution designed for horizontal cabling distribution within buildings, particularly in dynamic environments where office layouts and equipment locations may change. These consolidation points offer convenience and flexibility to adapt to evolving networking needs.

Key Features:

- **Modular Design:** The 12 Port Grove Consolidation Points are equipped with removable 6 Port modules, allowing for easy customisation and adaptability as per your specific cabling requirements.
- **Internal HD Foam Strips:** Integrated internal high-density foam strips contribute to enhanced cable management, providing support and protection for your cabling infrastructure.
- **Secure Lockable Covers:** The screw-lockable cover lids ensure that cabling connections remain properly secured, minimising the risk of accidental disconnections. Additionally, this feature helps prevent the ingress of dust, maintaining a clean and efficient cabling environment.

Grove Consolidation Points are not just a practical solution for current networking needs; they are designed with adaptability in mind, providing a reliable and organised approach to horizontal cabling distribution in ever-changing office environments.

Specifications:

- Net Weight: 2.45kg (Boxed)
- Dimensions: 247.7 x 240 x 57.2
- Colour: Black

Technical Support: 1300 732 254
