

Part Number: CA-GN0002

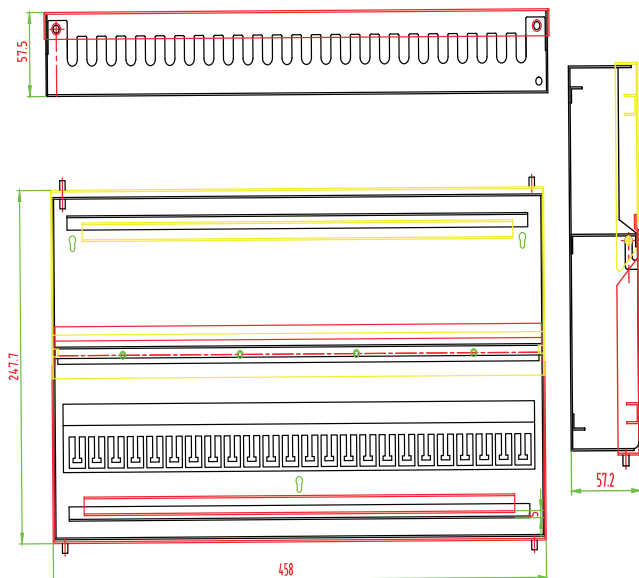

Description: GROVE Consolidation Point - 24 Port

Grove Consolidation Points offer a convenient and user-friendly solution for horizontal cabling distribution within buildings, specifically designed to adapt to changing office layouts and equipment locations.

Key Features:

- **Modular Configuration:** The 24 Port Grove Consolidation Points feature a modular design with removable 6 Port modules, providing versatility and adaptability for evolving networking needs.
- **Enhanced Cable Management:** Internal HD foam strips within the consolidation points contribute to effective cable management. This ensures an organised and tidy cabling infrastructure, reducing the risk of cable-related issues.
- **Secure Lockable Covers:** The screw-lockable cover lids are implemented to secure cabling connections, preventing accidental disconnections. Additionally, these covers minimise the ingress of dust, promoting a cleaner and more reliable networking environment.

Grove Consolidation Points are not only user-friendly but also offer advanced features that make them ideal for environments where office layouts and equipment locations are subject to change. With a robust design and thoughtful specifications, they provide a reliable solution for horizontal cabling distribution within buildings.

Specifications

- Net weight: 4.25kg (Boxed)
- Dimensions: 247.7 x 458 x 57.5
- Colour: Black

Technical Support: 1300 732 254
