

Part Number: AO-GN12IOR**Description: GROVE 12 Core Cable**

The GROVE 12 Core OM4 Indoor/Outdoor Cable per meter is a high-performance optical fiber cable designed for both indoor and outdoor use. With 12 optical fiber cores, it offers versatility and reliability for various applications requiring high-speed data transmission.

Key Features:

OM4 Fiber: Utilizes OM4 (Optical Multimode 4) fiber, which is optimized for high-speed data transmission over short to medium distances.

12 Core Configuration: Features 12 optical fiber cores, providing flexibility for different networking and connectivity needs.

Indoor/Outdoor Use: Designed to withstand both indoor and outdoor environments, making it suitable for a wide range of applications, including building-to-building connectivity.

High Bandwidth: OM4 fibers support high bandwidth, making the cable ideal for applications demanding high data rates, such as data centers, enterprise networks, and telecommunications.

Durable Construction: Built to withstand environmental factors, ensuring longevity and consistent performance in various conditions.

Versatile Applications: Suitable for a variety of applications, including backbone installations, horizontal cabling, and other scenarios where high-capacity and reliable fiber optic connectivity are essential.

Per Meter Measurement: Available for purchase per meter, allowing for customized lengths to meet specific installation requirements.

Ensure high-quality and efficient data transmission with the GROVE 12 Core OM4 Indoor/Outdoor Cable per meter, where advanced fiber optic technology meets the demands of modern networking.

Available Singlemode and Multimode OM2/OM4
