

Part Number: CA-GNLPB324**Description: 24 Port Shielded Unloaded Panel - Angled**

The Grove Elite 24 Port Shielded 19" Patch Panel, an advanced solution featuring four removable 6 Port Modules for streamlined termination and housing of Grove Elite Keystone Jacks. Designed to meet the needs of both Shielded and Unshielded variants, this patch panel offers a simple and compact platform for efficient network organisation.

Key Features-

- **Modular Termination:** The 24 Port Patch Panel includes four removable 6 Port Modules, providing a modular approach to termination and facilitating ease of maintenance and upgrades.
- **High-Strength Shielding:** Crafted with a high-strength die-casted zinc alloy shielding design, the panel meets industry standards for shielding. This ensures optimal performance and protection against electromagnetic interference.
- **Rear Cable Management:** Supplied with a rear cable manager, the patch panel helps organise and route cables effectively, contributing to a clean and tidy network setup.
- **Earthing Wire with Spade Connector:** The pre-fitted earthing wire with a spade connector ensures proper grounding, promoting network safety and stability.
- **Universal Compatibility:** Compatible with any 19" enclosures or frames, the Grove Elite Patch Panel seamlessly integrates into various networking setups.

**Specifications:**

- **Port Configuration:** 24 Ports
- **Modules:** 4 x Removable 6 Port Modules
- **Shielding:** Zinc Alloy Shielding (Shielded and Unshielded Variants)
- **Cable Management:** Rear Cable Manager
- **Earthing:** Pre-fitted Earthing Wire with Spade Connector
- **Compatibility:** Fits any 19" enclosures or frames
