

**Part Number: CM-GN0011****Description: GROVE RJ45 CAT6A Plug STP Field Terminable**

Terminable CAT6A Shielded RJ45 Plug IP20 – a state-of-the-art answer for hassle-free and tool-less termination of CAT6A shielded cables. This plug is meticulously crafted to simplify the termination process, eliminating the need for a traditional crimper while ensuring a steadfast and secure connection. The IP20 rating provides an extra layer of protection, rendering it suitable for diverse networking environments.

**Key Features-**

- **Tool-less Termination:** Offers a hassle-free termination process without the need for traditional crimping tools, simplifying the installation procedure.
- **Secure Connection:** Meticulously crafted to ensure a steadfast and secure connection, providing reliability in networking setups.
- **Shielded Design:** Specifically designed for CAT6A shielded cables, offering enhanced protection against electromagnetic interference (EMI) for improved signal integrity.
- **IP20 Rating:** Equipped with an IP20 rating, adding an extra layer of protection against dust and solid objects, making it suitable for various networking environments.
- **Versatile Compatibility:** Compatible with CAT6A shielded cables, making it a versatile solution for a range of networking applications.
- These features collectively make the Terminable CAT6A Shielded RJ45 Plug IP20 an advanced and reliable solution for terminating CAT6A shielded cables in diverse networking environments.
