

Part Number: ME-GN1001**Description: GROVE 16 Port 10/100 Fast Ethernet Switch**

Introducing our 16-Port 10/100 Fast Ethernet Switch—an exceptional networking solution meticulously crafted to deliver dependable and swift connectivity for all your devices. This efficient switch ensures seamless communication within your network, offering a robust combination of speed and reliability.

Key Features:**16 Fast Ethernet Ports:**

This switch boasts sixteen high-performance Fast Ethernet ports, allowing for swift data transfers at speeds of 10/100 Mbps, ideal for small to medium-sized networks.

Dependable Connectivity:

Designed for reliability, the switch provides stable and consistent connectivity, ensuring uninterrupted communication between connected devices.

Efficient Networking:

Engineered for efficiency, this switch facilitates seamless data flow, enhancing the overall performance of your network.

Plug-and-Play Simplicity:

Enjoy hassle-free installation with the plug-and-play feature, allowing you to swiftly set up and expand your network without the need for complex configurations.

Versatile Deployment:

With 16 ports, this switch accommodates a variety of devices, making it suitable for diverse environments, including small offices, homes, or businesses with moderate networking needs.

Compact Design:

The compact form factor ensures easy placement in any workspace, providing flexibility in positioning the switch according to your layout preferences.

LED Indicators:

Each port is equipped with LED indicators, offering clear visual status updates for quick monitoring and troubleshooting.

Whether you're establishing a new network or expanding an existing one, our 16-Port 10/100 Fast Ethernet Switch is a reliable choice, ensuring efficient connectivity for all your devices. Experience the seamless integration and performance that our meticulously crafted switch brings to your network.
