

Part Number: **RP-MTD0 / RP-MTE0**

Description: **GROVE 1RU Metal Cable Manager**
GROVE 1RU Metal Cable Manager - Weatherproof
GROVE 1RU Metal Cable Manager - Brush Panel
GROVE 1RU Plastic Cable Manager with Hinged Cover

Enhance the organization and efficiency of your networking or server cabinet with the 1RU Ring Cable Manager—a versatile solution for managing and securing cables in a compact space. This cable manager is designed to streamline cable routing and organization within a 1 Rack Unit (1RU) height, providing a tidy and accessible setup for your cabinet.

Upgrade your cabinet organization with the 1RU cable Manager, a reliable and space-efficient solution for streamlining cable routing and ensuring a neat and efficient networking or server cabinet setup.

Multiple rings available
Plastic or Metal available

Rack Unit Height:

A 1RU cable manager occupies a single standard rack unit, which is equivalent to 1.75 inches (44.45 mm) in height. This ensures efficient use of vertical rack space.

Cable Routing and Organization:

The primary purpose of a cable manager is to facilitate the neat and organized routing of cables within a rack. It helps prevent cable tangling, promotes airflow, and simplifies cable tracing and maintenance.

Finger Ducts or Management Rings:

Some cable managers include finger ducts or rings that help separate and organize individual cables. This prevents cables from becoming tangled and makes it easier to add, remove, or trace specific cables.

Material and Construction:

Cable managers are often constructed from materials like plastic or metal. The choice of material can depend on factors such as durability, weight, and cost.
