

**Part Number: CA-GNSPMBNK****Description: GROVE Blank Filler for Patch Panel**

Enhance the professional appearance and organization of your network infrastructure with the Blank Filler for Patch Panel. Specifically designed for use with Grove Express or Elite Patch Panels, these fillers offer a simple and effective solution to neatly blank off any unused RJ45 ports. Whether you are managing your network in a data center, server room, or office environment, these blank fillers contribute to a tidy and efficient setup.

\*Pack of 12 or individual available\*

#### Key Features-

##### Professional Appearance Enhancement:

Designed to enhance the professional appearance of network infrastructure, providing a clean and organized look to the patch panel setup.

##### Compatibility with Grove Express or Elite Patch Panels:

Specifically designed for use with Grove Express or Elite Patch Panels, ensuring seamless integration and compatibility with these networking components.

##### Effective Port Blanking:

Offers a simple and effective solution to blank off any unused RJ45 ports on the patch panel, preventing dust accumulation and maintaining a tidy appearance.

##### Neatly Organized Setup:

Contributes to a neatly organized network setup by covering unused ports, reducing visual clutter, and promoting an efficient use of space.

##### Versatile Application Environments:

Suitable for various application environments, including data centers, server rooms, and office settings, where maintaining a tidy network infrastructure is crucial.

##### Pack Options:

Available in pack options, allowing users to choose between a pack of 12 fillers or individual fillers based on the specific needs of their patch panel configuration.
