

Part Number: CS-GNUC80-6CC**Description: GROVE Cat6 Modular Jacks**

Explore pristine connectivity with GROVE Cat6 Modular Jacks in White, thoughtfully packaged in sets of 10. These RJ45 Cat6 jacks seamlessly integrate with most Australian-style wall face plates, delivering a reliable networking solution with 50-micron gold contacts for superior performance and reliability. Additionally, they're compatible with the Grove Punch down tool with a sensor (Part# TV-GNNSNT-12002) and the Grove 4 Pair Termination tool (Part# TV-GNRPT-U80A).

Key Features-**Connectivity and Color:**

GROVE Cat6 Modular Jacks offer pristine connectivity, ensuring reliable networking solutions. Multiple color provides a clean and neutral aesthetic that can seamlessly integrate into various environments.

Packaging:

The jacks are thoughtfully packaged in sets of 10, which can be convenient for projects requiring multiple connectors. This packaging approach may help with organization and easy deployment.

Compatibility with Australian-Style Wall Face Plates:

The Cat6 jacks are designed to seamlessly integrate with most Australian-style wall face plates. This ensures compatibility with the local infrastructure and makes them suitable for use in Australian networking environments.

Performance and Reliability:

The Cat6 jacks are equipped with 50-micron gold contacts. Gold contacts are known for their superior conductivity and resistance to corrosion, ensuring high performance and reliability over time.

RJ45 Cat6 Design:

The jacks are designed to accommodate RJ45 connectors, which are commonly used in Ethernet networks. This design ensures compatibility with standard networking equipment and cables.

Tools Compatibility:

The Cat6 jacks are compatible with specific tools, such as the Grove Punch down tool with a sensor (Part# TV-GNNSNT-12002) and the Grove 4 Pair Termination tool (Part# TV-GNRPT-U80A). This compatibility simplifies the installation process and ensures proper termination.
