

Part Number: ME-GNNBN**Description: GROVE Elite NBN Enclosure & G5 Switch Plate**

The Grove Elite NBN Home Media Enclosure Gen4 (Large) and Gen5 (small) is a cutting-edge solution for organizing and securing your home network infrastructure. Specifically designed for the National Broadband Network (NBN), this large enclosure provides a central hub for managing various networking components. With features such as ample space, cable management options, and compatibility with accessories like the Grove Elite GEN3 15 Pole Load Centre, it offers a streamlined and efficient solution for residential networking needs. Also available, Elite NBN G5 Switch plate S90.

Key Features of the Grove Elite NBN Home Media Enclosure Gen4 (Large) and Gen5 (Small):

NBN Compatibility:

Specifically designed for the National Broadband Network (NBN), ensuring compatibility and optimal performance for NBN infrastructure.

Gen4 (Large) and Gen5 (Small) Options:

Available in two sizes—Gen4 (Large) and Gen5 (Small)—providing flexibility to accommodate different home network setups and sizes.

Central Hub for Networking Components:

Serves as a central hub for organizing and managing various networking components, promoting a clean and efficient home network infrastructure.

Compatibility with Accessories:

Compatible with accessories such as the Grove Elite GEN3 15 Pole Load Centre, enhancing its functionality and customization options.

Efficient Residential Networking Solution:

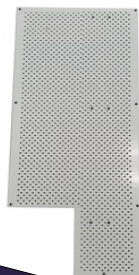

Provides an efficient and integrated solution for residential networking needs, offering a dedicated space for NBN equipment and other network components.

Switch Plate S90 for Gen5:

The availability of the Elite NBN G5 Switch Plate S90 complements the Gen5 (Small) enclosure, offering additional customization and connectivity options.

Also available GROVE Frame for GEN4 small enclosure.
