

Part Number: LV-XX0031

Description: **GROVE Krone/6P2C Test Lead**

The GROVE Krone/6P2C Test Lead is a specialized testing accessory designed for use in telecommunications and networking applications. This test lead is specifically crafted to interface with Krone connectors, which are commonly used in telephone and data cabling systems.

Key Features-

Connector Compatibility:

Engineered to seamlessly interface with Krone connectors, ensuring precise and reliable testing in telecommunication and networking environments.

6P2C Configuration:

Features a 6-position, 2-contact (6P2C) configuration, aligning with the Krone connector standard. This configuration is commonly associated with telephone and data applications.

Quality Test Leads:

Manufactured with high-quality materials to ensure durability and accurate signal transmission during testing procedures.

Versatile Testing:

Provides a versatile solution for conducting tests on Krone connections, facilitating troubleshooting and verification of cabling installations.

Telecommunication Applications:

Tailored for use in telecommunication applications, including testing and maintenance tasks in telephone and data networks.

Durability:

Built with durability in mind, capable of withstanding the rigors of regular testing and handling in various telecommunication environments.
