

**Part Number: TQ-GN0001/TQ-GN0002**

**Description: GROVE Side Cutters**

Introducing the GROVE 125mm & Side Cutters, specifically designed for making reliable flush cuts on copper data communications cables. These side cutters provide precision and efficiency for cable termination tasks, ensuring a clean and professional finish. Here are the key features:

**Length:**

125mm & 160mm : The compact size of these side cutters makes them suitable for precise and controlled cutting tasks.

**Cable Compatibility:**

Copper Datacomms Cables: Designed for use with copper data communications cables, providing a reliable solution for cable termination.

**Flush Cuts:**

Ideal for making flush cuts, ensuring a clean and neat finish on cable terminations.

**Precision Cutting:**

Provides precision cutting capabilities, allowing for accurate and controlled trimming of cables.

**Durable Construction:**

Constructed with durable materials to withstand the demands of cable termination tasks and maintain cutting effectiveness over time.

**Comfortable Grip:**

Features a comfortable grip for ease of use, reducing hand fatigue during prolonged cutting tasks.

**Professional Finish:**

Ensures a professional finish on cable terminations, meeting the quality standards required for data communications installations.

**Versatile Applications:**

Suitable for a variety of applications where precise and flush cuts on copper datacomms cables are essential.

**Product:**
