

**Part Number: ME-GN1007**

**Description: GROVE 300MB POE Wireless Access Point**

Introducing the Wireless Access Point with 300Mbps throughput and Power over Ethernet (PoE) support, a versatile solution designed to provide reliable and high-speed wireless connectivity. Here are the key features:

**Wireless Connectivity:**

**300Mbps Throughput:** Offers a wireless data throughput of 300Mbps, providing a fast and stable connection for various wireless devices.

**Power over Ethernet (PoE):**

**PoE Support:** Allows for Power over Ethernet, simplifying installation by delivering both data and power through a single Ethernet cable.

**Flexible Mounting Options:**

**Ceiling or Wall Mountable:** Designed for flexible deployment, with options for ceiling or wall mounting to suit various installation scenarios.

**Multiple Operational Modes:**

**Multiple Modes:** Supports various operational modes, including Access Point (AP), Client, WDS (Wireless Distribution System), and more, catering to diverse networking needs.

**Enhanced Security Features:**

**WPA/WPA2 Security:** Implements WPA and WPA2 security protocols to ensure the confidentiality and integrity of wireless communication.

**Quality of Service (QoS):**

**QoS Support:** Prioritizes network traffic to optimize performance for applications such as voice and video streaming.

**Guest Network Capability:**

**Guest Network:** Facilitates the creation of a separate guest network, enhancing security and privacy for the main network.

**Centralized Management:**

**Centralized Management:** Compatible with centralized management systems, enabling efficient control and monitoring of multiple access points.

**Intuitive Configuration Interface:**

**User-Friendly Interface:** Features an intuitive web-based interface for easy configuration and management.

**Product-**
