

Part Number: **RO-GN1008**

Description: **GROVE 12 Port Wall Mount Metal Fibre Box**

Fibre Box 12 Port Wall Mount: Robust Metal Enclosure for Fibre Optic Connectors

Upgrade your fibre optic connectivity with the Fibre Box 12 Port Wall Mount, a durable metal enclosure designed for wall mounting. This fibre box accommodates 12 ports for ST, FC, SC connectors or 24 ports for LC connectors, providing a secure and organized solution for fibre optic connections.

Upgrade your fibre optic connectivity infrastructure with the Fibre Box 12 Port Wall Mount, offering a robust and organized solution for your fibre optic connections.

Key Features-

Robust Metal Enclosure: The fibre box features a durable and robust metal construction, ensuring protection for your fibre optic connectors in various environments.

Wall Mount Design: Designed for easy installation on walls, providing a space-saving and organized solution for fibre optic connections in diverse settings.

Port Capacity: Accommodates up to 12 ports for ST, FC, SC connectors, or 24 ports for LC connectors, offering flexibility to meet different connectivity requirements.

Secure Connectivity: The enclosure provides a secure and protected environment for fibre optic connections, safeguarding against environmental factors and potential damage.

Versatile Connector Compatibility: Suitable for a range of connectors, including ST, FC, SC, and LC, ensuring compatibility with various fibre optic devices and cables.

Organized Solution: Helps maintain a neat and organized fibre optic infrastructure, minimizing cable clutter and facilitating easy identification of connections.

Upgrade Connectivity Infrastructure: Ideal for upgrading or expanding fibre optic connectivity in a variety of settings, including data centers, telecommunications facilities, and enterprise networks.
