

Part Number: RO-GN1009**Description: GROVE 12 Core IP55 Fibre Optic Termination Box**

The GROVE 12 Core IP55 Fibre Optic Termination Box is a robust and weather-resistant enclosure designed for terminating and managing fiber optic cables in outdoor or challenging environments. This termination box provides a secure and organized solution for protecting and maintaining the integrity of fiber optic connections.

Key Features:

- **12 Core Capacity:** The termination box accommodates up to 12 fiber optic cores, allowing for the termination and organization of multiple fiber optic cables within a single enclosure.
- **IP55 Weather Protection:** Built with an IP55 rating, this termination box is designed to resist dust and water, making it suitable for outdoor installations and environments with challenging weather conditions.
- **Durable Construction:** Constructed with durable materials to withstand environmental factors and ensure the long-term reliability of fiber optic connections.
- **Termination and Splicing:** Provides a secure space for termination and splicing of fiber optic cables, protecting them from external elements and potential damage.
- **Wall Mountable:** Designed for easy wall mounting, allowing for convenient and space-saving installations in outdoor settings.
- **Lockable Enclosure:** Equipped with a lockable enclosure for added security, preventing unauthorized access and ensuring the protection of critical fiber optic connections.
- **Versatile Connectivity:** Suitable for various fiber optic connectors, ensuring compatibility with a range of fiber optic devices and cables.
- **Easy Maintenance:** Designed for ease of maintenance and accessibility, allowing for straightforward management and troubleshooting of fiber optic connections.
- **Integrated Cable Management:** The termination box may include features for organized cable management, minimizing cable clutter and facilitating easy identification of connections.
- **Ideal for Outdoor Applications:** Specifically designed for outdoor applications, such as fiber-to-the-home (FTTH) installations, providing reliable and weather-resistant termination solutions.
